Base Cabinet Construction

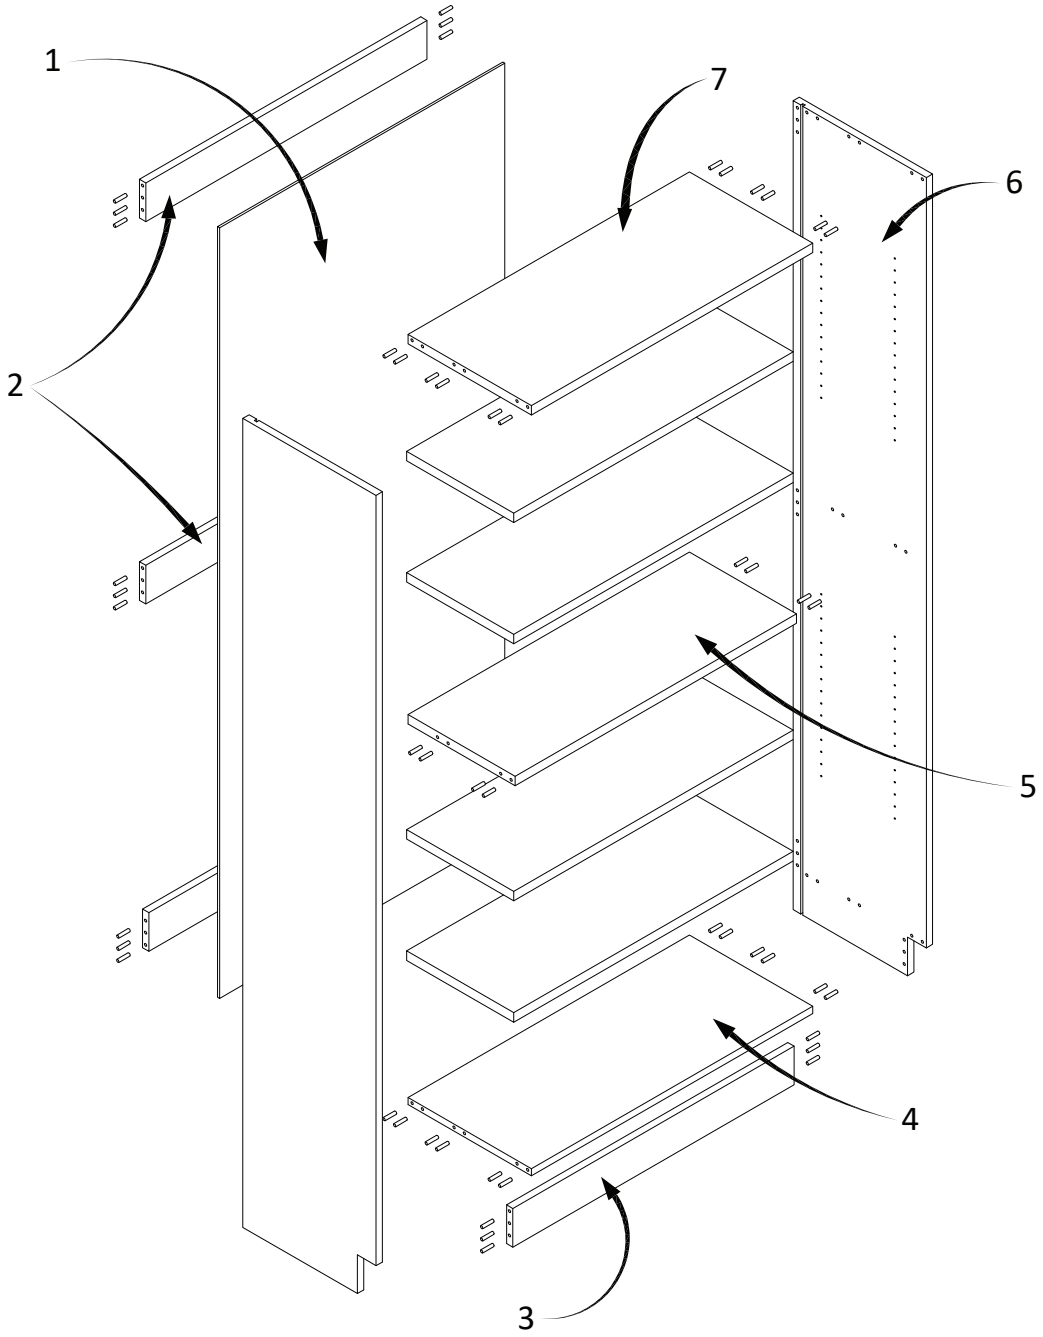

1. Rear anchor rails are 3/4” hardwood plywood, bored, doweled and glued into end panels.
2. Cabinets with exposed interiors have 1/4” hardwood plywood backs. Cabinets with unexposed interior have 1/4” color coordinated MDF backs. All backs are recessed and let into dadoed end panels and screwed to the back top rail and bottom panel. Cabinets with exposed backs are 3/4” hardwood plywood bored, doweled and glued into end panels.
3. Drawer separators (furnished only when requested) are 1/4” color coordinated MDF secured into dadoed intermediate front and back rails.
4. Toe rails are 4” high, 3/4” hardwood plywood, bored, doweled and glued into end panels.
5. Bottom panel is bored, doweled and glued into end panels. Bottom is 3/4” hardwood plywood.
6. All intermediate rails are bored, doweled and glued into end panels. Front rail: 2 1/2” x 3/4” solid hardwood with a solid edge band. Back rail: (when required) 2 1/2” x 3/4” solid hardwood.
7. End Panels are 3/4” hardwood plywood.
8. Center mullions are 2 1/8” x 1” solid hardwood tenoned, and glued into front and back rails. Center mullions are provided on cabinets wider than 30”.
9. Full horizontal top frame is bored, doweled, glued, and screwed to end panels. Front top rail: 2 1/4” x 1” solid hardwood with 3mm edge banding on front edge; rear top rail: 2 1/8” x 1” solid hardwood; side rails: 2 1/8” x 1” solid hardwood tenoned, and glued into front and back rails.

Wall Cabinet Construction

1. Cabinets with exposed interiors have 1/4” hardwood plywood backs. Cabinets with unexposed interior have 1/4” color coordinated MDF backs. All backs are recessed and let into dadoed end panels and screwed to the back top rail and bottom panel. Cabinets with exposed backs are 3/4” hardwood plywood bored, doweled and glued into end panels.
2. Rear anchor rails are 3/4” hardwood plywood, bored, doweled and glued into end panels.
3. Bottom panel is half-lapped, providing a full depth finished bottom.
4. Bottom panel is bored, doweled and glued into end panels. Bottom is 1” hardwood plywood.
5. Adjustable shelves are 1” hardwood plywood.
6. End panels are 3/4” hardwood plywood.
7. Top panel is bored, doweled and glued into end panels. Top panel is 1” hardwood plywood.

Tall Cabinet Construction

1. Cabinets with exposed interiors have 1/4” hardwood plywood backs. Cabinets with unexposed interior have 1/4” color coordinated MDF backs. All backs are recessed and let into dadoed end panels and screwed to the back top rail and bottom panel. Cabinets with exposed backs are 3/4” hardwood plywood bored, doweled and glued into end panels.
2. Rear anchor rails are 3/4” hardwood plywood, bored, doweled and glued into end panels.
3. Toe rails are 4” high, 3/4” hardwood plywood, bored, doweled and glued into end panels.
4. Bottom panel is bored, doweled and glued into end panels. Bottom is 3/4” hardwood plywood.
5. Adjustable shelves are 1” hardwood plywood. Center shelf is fixed for structural support.
6. End panels are 3/4” hardwood plywood.
7. Top panel is 1” hardwood plywood, bored, doweled, and glued into end panels.

Standard Drawer Construction

1. Drawer box sides have sanded smooth, radius top edges and receive a baked on coating of catalyzed vinyl conversion varnish for uniform protection. Each side of the drawer box is grooved to receive the white MDF drawer bottom.
2. Drawers are dovetailed on all four corners. Lipped style drawer fronts are integral, dovetailed to drawer box sides; while squared edge style drawer faces are screwed to the face of a fully constructed drawer box.
3. Once all four sides of the box encapsulate the drawer bottom, a continuous bead of glue is applied underneath to further secure the seal and the drawer.
4. Drawer slides are side/bottom mounted, heavy-duty, epoxy powder coated, 100 lbs. capacity and equipped with heavy duty ball bearing nylon rollers for smooth effortless operation.

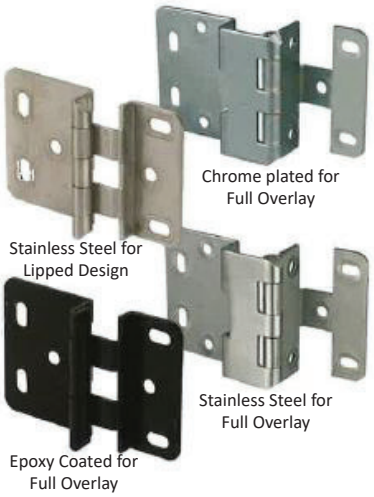

Standard Three-Point Latching System

1. CampbellRhea tall case doors have, as our standard, a three-point latching system where some competitors use only roller or magnetic catches.
2. The quality of CampbellRhea's three-point latching system enables the door to be pulled securely shut. Tapered aluminum rods - which engage plastic strike plates at the top and bottom of the case - move in nylon guides attached to the back of the door. The middle of the door is secured by a latch plate, which engages the side of the case, or latches behind the left door on cases with double doors.

Hinges

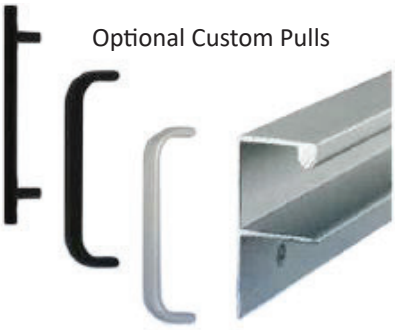

CampbellRhea's standard hinges are heavy-duty, laboratory grade and hospital tipped for consistency, strength and durability. They are certified to the rigors of SEFA-8 performance standards.
All CampbellRhea hinges are equipped with slotted holes for final adjustments in the field; and, installed with Euro screws for the best holding power over a simple wood screw.
CampbellRhea hinges, matched to lipped or squared edge styles, are available in a variety of standard finishes.

Pulls

CampbellRhea's tailored pulls are laboratory grade and feature distinctive, clean lines designed to compliment our casework styles. CampbellRhea standard pulls are ADA compatible and include a variety of standard options for each style.
Illustrated here are our selection of standard aluminum and epoxy powder-coated rods, flat bars, bow pulls; stained-to-match wood visor pull and a black plastic waterfall pull.
We also meet unique designer selections at a reasonable up-charge. Shown below are several custom pulls used on a variety of casework projects completed for our clients: a sleek aluminum "F" pull; "T" bar pulls in chrome or black powder coat; and, the matte finished black or brushed aluminum flat rod.

Locks

In today's laboratories, a wide variety of keying requirements are needed. As a CampbellRhea standard, locks are keyed differently, master keyed and two keys are provided with each lock. All lock faces match the project's selected hardware.

Keying systems can be keyed differently, master keyed or grand master keyed (5 pin only). To meet the unique needs of your project, CampbellRhea makes two key-lock options available:

- Five (5) pin mechanism
- Five (5) disc tumble mechanism

Five Disc tumble mechanism has a removable core system allows lock cores to be held out until the project is completed; removing the control security risk of lost or stolen keys during installation. Once installed, with the use of a control key, the lock core of the assembly can be removed and a new lock core inserted, changing an entire locking system in minutes.

Bright Chrome

Black

Brushed Chrome

Handles

CampbellRhea provides a SEFA-8 performance certified, ADA compatible "pull only" latching handle, and a latching or locking/turn handle in black or chrome for our tall case standard 3-point closure systems.

Painted Black

Brushed Chrome

Latches

Specialty locks, latches and catches are used in a variety of applications to secure closure of solid doors; as well as solid sliding, and glass sliding doors.

Ratchet/Slide Lock for Sliding Glass Doors

Elbow Latch with Metal Strike Plate
Standard

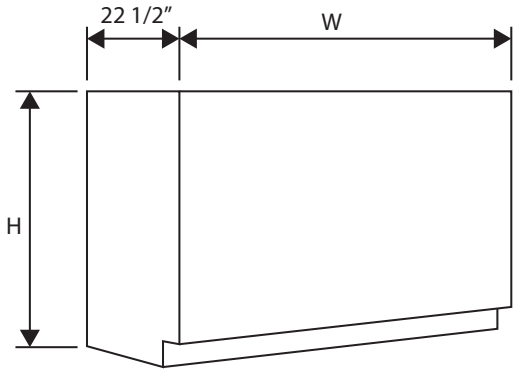

Friction Roller Catch with Metal Strike Plate
Standard

Magnet Catch with 11 lb. Pull Strength & Adjustable Positioning
Premium (additional cost)

Drawer and Cabinet Door Size Code (Group A)

Group A is our classic dimensioned cabinets. Unless otherwise specified, all cupboards are 21” deep, inside dimension. All shelves are full width, full depth, adjustable on double row drilling for maximum shelf adjustment flexibility, unless otherwise noted. Locks are not included in all units. Locks can be furnished on most units if specified. Security panels for locked drawer compartments are not included; however, they can be furnished if specified.

Cupboard Height and Width

Classic (Group A)

Holding to true traditional, classic wood casework design, this style demonstrates a bold strength of body with the smooth arc of style.
Styling: A unique style of squared overlay design accented with a classic radius front while the back edge remains squared.
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers - Horizontal grain. Doors - Vertical grain
Pull: Black Aluminum Bow Rod
Latching/Locking Handles: Black
Locks: Black
Hinges: Black Finished Steel
Dimension Style: Fractional (Group A)

Spectrum (Group A)

Offering a wide variety of color with plastic laminate faces and a clean tailored look.
Styling: Squared edges with black PVC edge band applied after lamination, overlap the opening by 1/4".
Material: Available in Oak and Maple
Drawer and Door Grain Direction: When required, to be horizontal on drawers and vertical on doors
Pull: Black Powder Coated Rod
Latching/Locking Handles: Black
Locks: Black
Hinges: Black Finished Steel
Dimension Style: Fractional (Group A)

Signature II (Group A)

Plain sliced oak or rotary cut maple, combo-grain veneer faces with solid wood edging.
Styling: Edges are squared & overlap the opening by 1/4".
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers - Horizontal grain. Doors - Vertical grain
Pull: Aluminum Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Fractional (Group A)

Empire (Group B)

Plain sliced oak or rotary cut maple, vertical grain veneer faces with solid wood edging.
Styling: Full flush overlay with squared edges.
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers and Doors - Matched Vertical grain
Pull: Aluminum Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Even (Style B)

Inspire (Group B)

Styling: This design features inset drawer and door.
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers and Doors - Matched Vertical grain
Pull: Aluminum Bow Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Even (Style B)

Legend (Group B)

Styling: This design features wide gentle curves of solid lumber on drawer and door side edges, with solid core.
Material: Available in Beech, Oak and Maple
Drawer and Door Grain Direction: Drawers and Doors - Matched Vertical grain
Pull: Aluminum Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Even (Style B)

Tier One (Group B)

The perfect blend of old world craftsmanship and modern design.
Styling: Full flush overlay
Material: Available in Oak, Maple, Cherry, Bamboo, European Beech and American White Ash
Drawer and Door Grain Direction: Drawers and Doors - Matched Vertical grain
Pull: Stainless Steel
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Stainless Steel
Dimension Style: Even (Style B)

Symphony (Group B)

Rift cut oak, solid wood edging
Styling: Full flush overlay with squared edges.
Material: Available in ONLY Oak
Drawer and Door Grain Direction: Drawers and Doors - Matched Vertical grain
Pull: Aluminum Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Even (Style B)

Heritage (Group A)

Historically, CampbellRhea's most popular style combines a classic design with traditional laboratory casework lines.
Styling: Machine radius, lipped edges are semi-recessed & overlap the opening by 1/4".
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers - Horizontal grain. Doors - Vertical grain
Pull: Aluminum Flat Bar
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Stainless Steel
Dimension Style: Fractional (Style A)

Signature (Group A)

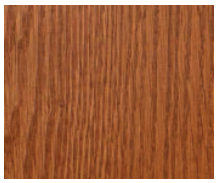

Another perennial favorite with clean, trim professional looks.
Styling: Edges are squared & overlap the opening by 1/4"
Material: Available in Oak and Maple
Drawer and Door Grain Direction: Drawers - Horizontal grain. Doors - Vertical grain
Pull: Aluminum Rod
Latching/Locking Handles: Chrome
Locks: Chrome
Hinges: Chrome
Dimension Style: Fractional (Style A)

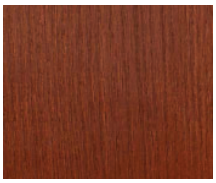

1. CampbellRhea selects the finest Quality Oak and Maple lumber and veneer-faced plywoods.
2. All surfaces are progressively sanded smooth, starting with #120 grit sandpaper and finishing with #220 grit sandpaper.
3. After sanding, surfaces are vacuumed and blown to eliminate all dust particles.
4. An equalizing toner is applied to establish consistent color uniformity.
5. The specified NGR (non-grain raising) stain is pressure applied to reveal the hidden beauty of the grain. The stain coat is allowed to air dry.
6. CampbellRhea's catalyzed vinyl conversion varnish sealer is pressure applied, penetrating all exposed wood surfaces for uniform protection.
7. The sealed product is placed in specially designed high temperature ovens at 135-140°F to ensure a complete & thorough cure.
8. All surfaces are again hand sanded, providing a smooth consistent surface to accept two coats of CampbellRhea's catalyzed conversion varnish top coat.
9. Our standard finish meets AWI/QCP requirements by receiving two applications of the catalyzed conversion varnish and the product is again place in specially designed high temperature ovens at 135-140°F to ensure a complete & thorough cure.
10. The unique CampbellRhea stains and the custom finish, provide a high quality luster to the surface and maximum resistance to scuffing, dents, moisture, chemicals and solvents in the laboratory environment - or any casework application.

Kneespace Components

Kneespace components for ADA accessibility are designed for use in casework assemblies, or with legs to the left or right. Leg height of 32 1/2” must be specified. The 4 7/8” H x 3/4” solid lumber front rails are machined to allow appropriate clearance for use in ADA accessible areas. The ADA guidelines state that kneespace components allow a minimum of 30” of machined clearance area; therefore, components are available in 35 1/4”, 41 1/4” or 47 1/4” widths.

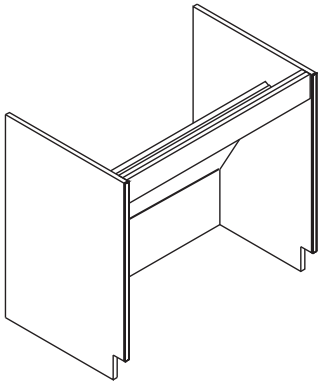

Catalog Number	Width	Depth

ADA Accessible, Wash Up Sink & Counter

Assembly designed to include provisions for wheelchair space at sink and services. Rinse counter provides a long sloped counter, integral sink, continuous raise edges and coved corners to retain spilled materials and liquids. Top assembly epoxy or phenolic resin (specify). Sink assembly has bi-level work surfaces to accommodate recommended maximum 34” wheelchair height and 36” for stand up height. Stand up work surface slopes toward wheelchair work surface, which in turn slopes toward integral sink. Molded integral sink is sloped from front to back with overall depth not to exceed 6 1/2” deep. A molded integral ledge is located at rear of sink to accommodate services. Casework assembly consists of (1) 1278L cabinet and (1) 2338 sink cabinet (without sink hangers). A removable one piece closure panel conceals sink service piping. Unit has one hot and cold mixing faucet with wrist blade handles.

Catalog Number: 8815

(1) Drawers (I.D.)	20 1/2”	6”	17”

ADA Accessible, Casework Lab Station

Equipment:

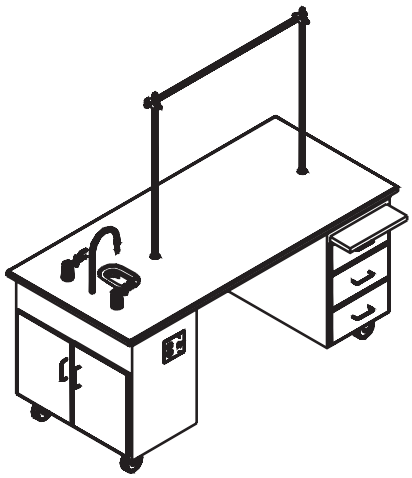

- (1) epoxy resin sink, 15” x 11” x 5 1/2” (O.D.)
- (1) hot and cold water gooseneck faucet with 4” wrist handles and aerator
- (1) single gas cock
- (1) duplex AC pedestal receptacle, GFCI type 20 amp
- (1) 1 1/2” epoxy resin sink outlet
- (1) #9632 “P” trap assembly
- 1” thick work surface with 1/4” thick, flush sink cover - to be specified

Sink cabinet is rigidly constructed with a full horizontal top frame, top vertical rails at front and rear, and a vertical rear panel at bottom for additional rigidity. Double-walled end panels provide space for retraction of pocket doors. Door pulls are AL -2 style, a 3/8” round aluminum wire type, 4 3/8” long for ample finger hold. Doors do not extend more than 1” past front edge of counter top when in full retracted position. Toe rails fold back, and cupboard bottom hinges up and locks in place to cover sink, trap and piping. In up, locked position, this provides approved clearance space for wheelchair access. Interior side panels are removable for access to door hardware. All interior panels are oak plywood finished to match exterior casework. Doors can not have locks.

Catalog Number: 8774			
Dimensions of Components	Width	Height	Depth
Overall	36 3/4”	32 1/2”	24”

Catalog Number: 8778

Same as 8774 except 41 1/4” wide

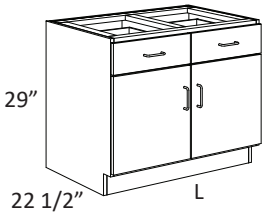

Equipment:

- (1) cold water fixture with electric pump and (2) 3-way switches
- (1) each, 2 1/2 gallon polyethylene carboy for supply and waste
- (1) epoxy resin cup sink, 3” x 6” diameter
- (1) gas cock and (1) air cock with 10’ supply hose
- (4) 5” diameter casters: (2) rigid, (2) swivel with locks
- (1) aluminum crossbar assembly with (2) rod sockets
- (1) 25’ electric supply cord, 16-3SJ with plug (NEMA S-15P), one automatic rewind reel
- 1” thick work surface - specify material

Carboys , electric pump and cord with its rewind wheel are housed in the two door cupboard on one end of unit. The other end unit has two drawers with a pullout board on one side, and three drawers with a pullout writing board on the opposite side. Unit is equipped with (3) duplex, 15 amp, 120 volt AC receptacles; (1) is GFCI type for complete circuit protection. Support frame for top is 1” x 2 1/2” steel tubing, with black acid resistant finish.

Wood Adjustable Tables with Hand Crank

These tables can be used by a wheelchair bound student, as a basic classroom table or as a satellite table with tri-fascia service islands. Unit allows great laboratory/classroom flexibility, since it can be adjusted in height for a variety of purposes, or used as a basic, classroom table that meets ADA guidelines. Tables will support a 500 lbs. static load. Crank mechanism will lift a maximum load of 250 lbs including top and frame.

The hand-crank adjustable pedestal is constructed from anodized aluminum. The pedestal has an integral stabilizing rail. Pedestal feet are equipped with four glides. The table is shipped knocked down, and handle can be mounted to the left or right at the time of assembly. The folding handle can easily be stored inside the crank box when not in use.

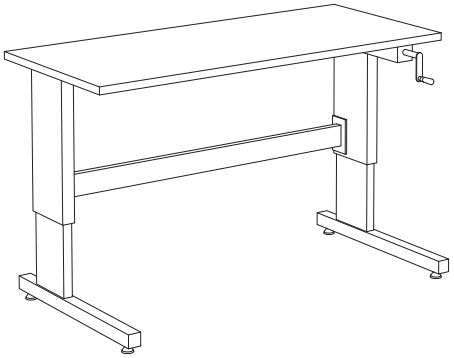

Work surface material is 1” thick Rheatex.

Tables with Wood Frames
