Magnetar™ Laboratory Table

View 1

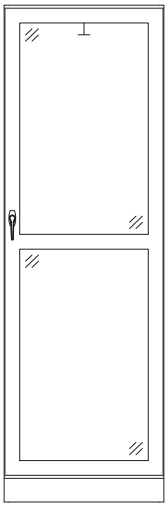

View 2

The Magnetar Laboratory Table is designed to accommodate both lab and lecture functions while providing ample counter top space for 4. A centralized work center provides access to computer, monitor, and wired or remote keyboard, while maximum counter space remains available for lab experiments when required.
Base is wood with internal steel frame a pull-out shelf that provides ample space for securing CPU, hardware and a printer (not included).
The work surface is adjustable from 30” to 35”, allowing the table to be ADA accessible or used by standing or seated students not requiring ADA compatibility. The work surfaces is adjusted by an electric actuator using a key switch in the sink cabinet, and requires no special tools for adjustment.
The ADA compliant sink cabinet is at a fixed height of 34”, and is equipped with two combination cold water and gas fixtures, two GFCI duplex electric receptacles, and a 14” x 10” x 5” drop in sink. Work surface material to be specified. Optional mobile 3 drawer cabinets with specified 1” work surface material are available.

This 8 student, five section table provides approximately 4 lineal feet of work surface and (1) 4’ base cabinet for each student.

Equipment:

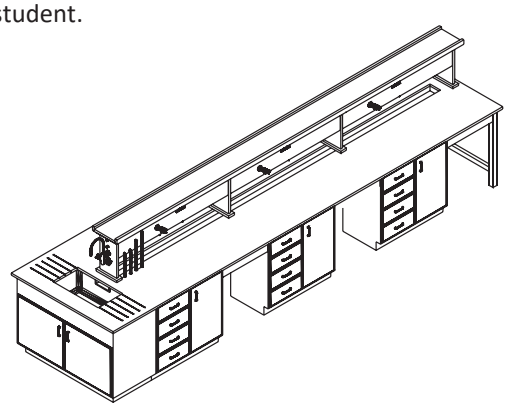

- (4) hot and cold water mixing faucet
- (8) gas cocks
- (8) duplex AC receptacles
- (4) epoxy sinks
- (4) polypropylene sink outlet
- (8) adjustable shelves
- 1” thick reagent racks constructed out of black phenolic. Fascia panel are 3/4” thick, when provided
- 1” thick work surface - material to be specified (Box curb will be made from same material)

Note: Traps, service piping and electric conduit are not included

ADA Wash-Up Sink

This assembly is designed to include provisions for wheelchair space at sink and services. Rinse counter provides a long sloped counter, integral sink, continuous raised edges and coved corners to retain spilled materials and liquids. Top assembly is epoxy or phenolic resin (to be specified). Sink assembly has bi-level work surfaces to accommodate recommended maximum 34" wheelchair height and 36" for stand up height. Stand up work surface slopes toward wheelchair work surface, which in turn slopes toward integral sink. Molded integral sink is sloped from front to back with overall depth not to exceed 6 1/2" deep. A molded integral ledge is located at rear of sink to accommodate services. Casework assembly consists of (1) 1278L cabinet, and (1) 2338 sink cabinet (without sink hangers). A removable one piece closure panel conceals sink service piping. Unit has one hot and cold water mixing faucet with wrist blade handles.

Special Storage Base Cabinets

Units equipped with pullout shelves behind cabinet doors should not be located in a corner or next to any cabinet, case or other obstruction, which would keep the door from having an opening swing of approximately 110°. This allowance is required to allow pullout trays or shelves to clear back edge of door. If the unit must be located in a corner, a filler strip of at least 6", must be provided between the case and the wall.
