Drop leaf	16”	-	-

Instrument Storage

Instrument storage cases are constructed of particle board panels with all interior faces, exposed or unexposed, and all unexposed exterior faces, frosty white. All exposed exterior faces are vertical grade, high pressure plastic laminate in the specified pattern or color. Top panels are 1" thick, backs 1/4" thick, and all other panels 3/4" thick. Leading edges of all interior dividers are protected with anodized aluminum channel. Exposed edges of top, bottom and end panels are edge banded with black 3mm PVC. The 1/4" thick back is recessed 1", let into routed end panels. Case is further reinforced with 3/4" x 4" cross rails on the back side, at the top, and center.

Full doors, when specified, have squared edges without profiling, and overlap the face of the cabinet, exposing a full 3/4" thick material with black 3mm PVC applied to all four edges. Doors are 3/4" thick particle board with vertical grade high pressure plastic laminate on both faces. Doors are equipped with a 3-point latching, or locking system.

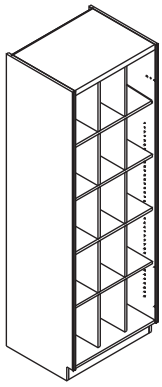

Steel doors, when specified, are 18 ga. welded construction with 1/2" diameter perforations, and equipped with a 4" black plastic semi-recessed pull. Hinges are continuous type with one wing welded to the door frame. Each door is provided with padlock eyes and a 3/4" x 3" name plate. Finish is textured slate gray.

If Solid Oak Instrument Storage Casework is desired: Refer to our CampbellRhea wood casework specifications for construction details. Use given Instrument Storage Casework catalog numbers, and add suffix "-w". Example: 7950-W. Grille doors can be furnished as described above.
